

## **THE INSTITUTE OF VETERINARY BACTERIOLOGY OF THE UNIVERSITY OF BERN OFFERS A 100% POSITION FOR A LABORATORY TECHNICIAN IN THE FIELDS OF HOST- PATHOGEN INTERACTIONS AND SYNTHETIC GENOMICS**

We are looking for a flexible, enthusiastic and highly motivated laboratory technician to support and further implement our laboratory staff of the research unit. Starting date as soon as possible:

The ideal candidate for us:

- has at least 3 years of experience in molecular cloning;
- has experience in cell culture techniques;
- experience in working with *Saccharomyces cerevisiae*;
- has good organizational and administrative skills;
- can work under time constraints if needed;
- is able to work independently with regular reporting to the head of unit;
- willingness to travel on mission to other laboratories outside Switzerland;
- is fluent in written and spoken English. German is an asset.

Since the Laboratory unit continues to grow, we can offer an interesting setting for future development and interesting long-term career perspectives. Additional specific training can be offered depending on candidates' profile and skills. We offer a diversified, developable job, our institute is situated in the center of Bern and an international team is awaiting you!

Salary and social benefits according to the guidelines of University of Bern and provisions of the canton of Bern.

Are you interested in this position? Please send us your electronic application as a single PDF file (Letter of intent, curriculum vitae, diplomas, and contact information of at least one reference) to the following e-mail: [barbara.gautschi@vetsuisse.unibe.ch](mailto:barbara.gautschi@vetsuisse.unibe.ch) [www.vbi.unibe.ch/index\\_ger.html](http://www.vbi.unibe.ch/index_ger.html)

Recruitment will start immediately and continue until the position is filled.
